

CISCO CCNA CERTIFICATION

Give your career an upgrade with a Cisco CCNA Certification.

Gain the necessary training to prepare for the Cisco CCNA Certification. In this course you will learn the fundamentals of computer hardware, software, and operating systems. This includes developing a practical understanding of the operation of modern TCP/IP networks built with Cisco hardware. At the end of this course, you will be ready to sit for the exam and earn your Cisco CCNA Certification.

COURSE TOPICS

- Networking Fundamentals
- CISCO IOS Configurations
- LAN Switching Technologies
- IP Addressing & Subnetting
- WAN Routing Technologies
- LAN / WAN IP Network & Services
- CISCO Routers & Switches
- IP Data Network Solutions

This course is taught with Brandman's LIVE ONLINE training format using a video communications software. Students receive the same high-quality training as found in a traditional classroom setting. Join us from anywhere with an Internet connection.
